Education

George Mason University – Fairfax, VA

Master of Science (MS) in Computer Science

Aug 2021 – May 2023

GPA: 3.53

University of Mumbai - India

Bachelor of Engineering (BE) in Computer Engineering

Aug 2016 – Nov 2020

GPA: 3.2

Technical Skills

Languages: Python, Java, JavaScript (ES6), C, C++

Front-End: HTML5, CSS, React.js, Redux

Frameworks: Node.js, Django, Angular, Spring Boot, jQuery, Bootstrap, PHP, Ajax

Development Tools: Visual Studio Code, Git, Jenkins, Figma

Cloud Platforms: AWS, GCP

Containers & Orchestration: Docker, Kubernetes

Issue Tracking: JIRA

Databases: SQL, NoSQL (MongoDB), MySQL

Methodologies: Agile/Scrum

Certifications: [AWS Solution Architect Associate Certified](#), Python, Data Structures, UI/UX Design

Professional Experience

Test Automation Development Co-op, NOKIA – Fairfax, VA

Sep 2022 – May 2023

- Automated test suites with Python scripts, reducing manual testing time by 50%.
- Utilized Jenkins, Git, and JIRA to identify, troubleshoot, and fix system flaws, enhancing software quality and accelerating delivery in an Agile/Scrum environment.
- Collaborated with cross-functional teams to integrate testing into Agile development and documenting actions taken.
- Demonstrated a deep understanding of business value and implications, collaborating effectively with diverse team members.

Graduate Teaching Assistant, George Mason University – Fairfax, VA

Aug 2022 – Dec 2022

- Assisted with the course Ethics and Law for Computer Professionals (CS-306) as a teaching assistant. Responsibilities included creating lab assignments, grading assignments, and providing clarification to students.
- Monitored and analyzed industry trends, system analysis, and design developments, providing students with timely insights.
- Engaged with students to ensure comprehension of course material and fundamental concepts.

Full-stack Developer, Let It Wag – Mumbai, India

Jun 2019 – May 2020

- Designed a real-time application, "Let it Wag," unifying stakeholders in animal welfare, saving 4000+ animals, and serving 13K+ users.
- Engineered a mobile application for disease diagnosis based on user-input symptoms, using advanced analysis and predictive algorithms. [Mobile App: Download](#)
- Collaborated proficiently on UI/UX design, API integration, and effective troubleshooting, proficiently managing Git repositories and meticulously documenting development processes.

Project Experience

Cloud Computing

May 2022 – Dec 2022

- **Amazon Web Services** | Java, Spring Framework, AWS EC2, AWS S3, AWS RDS MySQL, Docker, Kubernetes, Angular, CSS3, Jenkins, Typescript, SoapUI
- Programmed an Angular application with RESTful Web Services, JPA/Hibernate, and Amazon Relational Database Service (Amazon RDS)/MySQL to persist and read data to/from a relational database.
- Containerized the application using Docker Technology and deployed it on Kubernetes, utilizing the Spring Framework and conducted data manipulation while collaborating with team members for API integration and environment setup.
- **Google Cloud Platform** | ASP.NET Core MVC, Entity Framework, GitHub, Kubernetes, Jenkins, Rancher, GCP
- Developed a containerized web application on Google Kubernetes Engine (GKE) to enable scalability and resiliency.
- Established a CI/CD pipeline using Git as a source code repository on GitHub and Jenkins as the deployment tool for Kubernetes, contributing actively to troubleshooting and robust production support, reducing deployment time by 40%.

Telecom Churn Case Study | Python, Data Mining, Machine Learning, Regression

Feb 2022 – Apr 2022

- Created a predictive model for telecom churn by analyzing data, generating new features, and addressing class imbalance using the Synthetic Minority Oversampling Technique (SMOTE).
- Implemented Decision Tree classifier and logistic regression, fine-tuning their parameters to identify significant factors and achieved testing accuracies of 91.77% and 75.18%, respectively.
