Education

George Mason University – Fairfax, VA

Aug 2021 – May 2023

Master of Science (MS) in Computer Science

University of Mumbai - India

Aug 2016 – Nov 2020

Bachelor of Engineering (BE) in Computer Engineering

Technical Skills

Languages: Python, JavaScript (ES6), Java, TypeScript, Ruby, C, C++

Front-End: HTML5, CSS, React, Tailwind CSS, Figma

Frameworks: Node.js, GraphQL, Angular, Spring Boot, jQuery, Ruby on Rails, Django, Flask, Bootstrap, PHP, Ajax

Development Tools: GitHub, Git, Jenkins, Buildkite, Agile, AWS, GCP, Docker, Kubernetes, Postman

Databases: SQL, NoSQL (MongoDB / Redis), Postgres

Networking Protocols: TCP/IP, DNS, DHCP, HTTP/HTTPS

Certifications: AWS Solution Architect Associate Certified (Validation no: PTZD19XCS2F412GS)

Professional Experience

Research Assistant, George Mason University – Fairfax, VA

Aug 2023 – Present

- Contributed to AI research by provisioning and managing infrastructure resources using Terraform while leveraging TensorFlow and Python for deep learning models in image recognition.
- Conducted literature reviews, data analysis, and experiments for ongoing projects.
- Demonstrated analytical skills, showcased ChatGPT expertise, and stayed current with AI advancements through active participation in academic events.

Test Automation Development Co-op, NOKIA – Fairfax, VA

Sep 2022 – May 2023

- Developed automated test suites using Python scripts, leading to a 50% reduction in manual testing time.
- Utilized Jenkins to automate build processes, Git for version control, and JIRA for issue tracking to identify and resolve system flaws, significantly improving software quality and expediting delivery in an Agile/Scrum environment.
- Collaborated cross-functionally to integrate testing into Agile development, ensuring comprehensive SDLC test coverage.
- Enhanced overall product quality and customer satisfaction through effective collaboration with diverse team members.

Graduate Teaching Assistant, George Mason University – Fairfax, VA

Aug 2022 – Dec 2022

- Developed and graded lab assignments for 50+ students, improving understanding with comprehensive support.
- Stayed updated on industry trends through continuous research, maintaining expertise in the field.
- Enhanced student learning with interactive teaching methods, facilitating a comprehensive understanding of course material.

Full Stack Developer, Let It Wag – Mumbai, India

Jun 2019 – May 2020

- Designed and developed a real-time application aimed at unifying stakeholders in animal welfare, resulting in over 4000 animals saved and serving a user base of 13K+.
- Implemented Flask backend APIs to ensure seamless communication between the mobile app and server infrastructure.
- Collaborated with cross-functional teams to ensure seamless UI/UX design and successfully integrated APIs using React and Tailwind CSS for dynamic interfaces, resulting in improved user engagement and client satisfaction.

Project Experience

Cloud Computing

May 2022 – Dec 2022

- **Amazon Web Services** | *Java, Spring Framework, AWS EC2, AWS S3, AWS RDS MySQL, Docker, Kubernetes, Angular, CSS3, Jenkins, SoapUI*
 - Programmed an Angular application with RESTful Web Services, JPA/Hibernate, and Amazon RDS/MySQL to persist and read data to/from a relational database in order to enhance user experience and streamline data management processes.
 - Successfully containerized the application using Docker Technology and deployed it on Kubernetes, resulting in a 30% decrease in deployment time. Improved data manipulation processes, leading to a 20% increase in overall performance.
- **Google Cloud Platform** | *ASP.NET Core MVC, Entity Framework, GitHub, Kubernetes, Jenkins, Rancher, GCP*
 - Developed a responsive single-page application using TypeScript, React, Node.js, and Tailwind CSS to enhance user experience and containerized the web application on Google Kubernetes Engine (GKE) to enable scalability and resiliency.
 - Established a CI/CD pipeline using Git (GitHub) and Jenkins, significantly reducing deployment time by 40% and ensuring streamlined production support.

Telecom Churn Case Study | *Python, Data Mining, Machine Learning, Regression*

Feb 2022 – Apr 2022

- Created a predictive model for telecom churn by analyzing data, generating new features, and addressing class imbalance using the Synthetic Minority Oversampling Technique (SMOTE).
- Implemented Decision Tree classifier and logistic regression, fine-tuning their parameters to identify significant factors and achieved testing accuracies of 91.77% and 75.18%, respectively.
