SUMMARY

Experienced Full-stack developer and Software Engineer with 2+ years of experience in test automation and cloud technologies. Well-versed with front-end and back-end development, system design, and cloud services (AWS, GCP). Successfully managed multiple projects and led 2 teams, consistently meeting deadlines. Strong collaborator with excellent communication skills and a solid background in Agile methodologies.

TECHNICAL SKILLS

Certification	AWS Solution Architect Associate Certified (Validation no: PTZD19XCS2F412GS)
Languages	Python, Java, JavaScript, C, C++, TypeScript, Ruby
Front-End tools	HTML5, CSS, React, Tailwind CSS, Figma
Frameworks	Node.js, GraphQL, Angular, Spring Boot, jQuery, Ruby on Rails, Django, Flask, Bootstrap, PHP, Ajax, React Native
Dev Tools	GitHub, Git, Jenkins, Agile, AWS, GCP, Docker, Kubernetes, Postman
Database	MySQL, NoSQL (MongoDB / Redis)

WORK EXPERIENCE

Research Assistant, George Mason University – Fairfax, VA

Aug 2023 – Present

- Enhance resource allocation efficiency by managing infrastructure resources using Terraform, applying TensorFlow and Python for developing deep learning models in image recognition within AI research projects.
- Aid in the visualization of research data by developing and maintaining a dashboard for customers, processing and rendering large datasets on the UI using React and an internal React components library.
- Present research findings effectively by utilizing external libraries like Kendo UI Data Grid and Vega-Lite to create dynamic dashboards and charts.
- Support data-driven research projects by building new APIs to fetch and render data from databases, enhancing backend functionality.

Test Automation Development Co-op, NOKIA – Fairfax, VA

Sep 2022 – May 2023

- Reduced manual testing time by 50% by creating automated test suites with Python scripts.
- Enhanced software quality and expedited delivery by designing and executing end-to-end testing strategies and automation suites using TestCafe and RestAssured for web applications and microservices.
- Ensured continuous integration and delivery by integrating automated test scripts into Jenkins CI/CD pipelines.
- Validated RESTful and SOAP services by conducting extensive API testing using RestAssured and Postman.
- Achieved comprehensive SDLC test coverage by collaborating cross-functionally to integrate testing seamlessly into Agile development.

Graduate Teaching Assistant, George Mason University – Fairfax, VA

Aug 2022 – Dec 2022

- Enhanced student comprehension for over 50 students by developing and assessing lab assignments for the Ethics and Law for Computer Professionals course, providing comprehensive guidance.
- Promoted a thorough grasp of course material by staying current with industry trends through ongoing research and fostering student learning with interactive teaching techniques.

Full Stack Developer, Let It Wag – Mumbai, India

Jun 2019 – May 2020

- Rescued over 4000 animals and served a user base of 13K+ by conceiving and building a real-time application to unite stakeholders in animal welfare, and engineering Flask backend APIs to facilitate seamless communication between the mobile app and server infrastructure.
- Ensured high performance and responsiveness of the web application by developing end-to-end features using React, Redux, and TypeScript.
- Achieved scalable and secure deployment by managing cloud infrastructure using AWS and setting up EC2 instances, S3 buckets, and RDS.
- Enhanced backend functionality by developing and maintaining backend services using Node.js, fetching data from SQL databases for various functionalities, and deploying applications in Azure using Docker and Jenkins.

EDUCATION

George Mason University – Fairfax, VA

GPA: 3.5

Master of Science (MS) in Computer Science

University of Mumbai - India

GPA: 3.2

Bachelor of Engineering (BE) in Computer Engineering

ACADEMIC PROJECTS

Cloud-native Application Development Projects | Python, Data Mining, Machine Learning, Regression

May 2022 – Dec 2022

Amazon Web Services | Java, Spring Framework, AWS EC2, AWS S3, AWS RDS MySQL, Docker, Kubernetes, Angular, CSS3, Jenkins, SoapUI

- Enhanced user experience and streamlined data management by developing an Angular application with RESTful Web Services, JPA/Hibernate, and Amazon RDS/MySQL.
- Reduced deployment time by 30% and improved data manipulation processes by 20% by containerizing the application using Docker Technology and deploying it on Kubernetes.

Google Cloud Platform | ASP.NET Core MVC, Entity Framework, GitHub, Kubernetes, Jenkins, Rancher, GCP

- Improved user experience by creating a responsive single-page application using TypeScript, React, Node.js, and Tailwind CSS.
- Ensured scalability and resiliency by containerizing the web application on Google Kubernetes Engine (GKE).
- Reduced deployment time by 40% and ensured efficient production support by implementing a CI/CD pipeline with Git (GitHub) and Jenkins.

Telecom Churn Analysis Project | Python, Data Mining, Machine Learning, Regression

Feb 2022 – Apr 2022

- Developed a scalable predictive model for telecom churn to enhance customer retention strategies by analyzing large datasets, generating new features, and addressing class imbalance using the Synthetic Minority Oversampling Technique (SMOTE).
- Enhanced model performance and accuracy by implementing and fine-tuning Decision Tree classifiers and logistic regression models, achieving testing accuracies of 91.77% and 75.18%.
- Streamlined data processing and feature engineering by utilizing Python and data mining techniques to improve the efficiency and reliability of the predictive model.
