Education

George Mason University – Fairfax, VA

Master of Science (MS) in Computer Science

Aug 2021 – May 2023

GPA: 3.53

University of Mumbai - India

Bachelor of Engineering (BE) in Computer Engineering

Aug 2016 – Nov 2020

GPA: 3.2

Technical Skills

Languages: Python, Java, JavaScript, C, C++, HTML5, CSS

Frameworks: React.js, Node.js, Django, Angular, jQuery, Bootstrap, CodeIgniter, PHP and Ajax, Agile/Scrum

Tools & Platform: AWS, GCP, Git, Jenkins, Spring Boot, Kubernetes, Docker, JIRA, Figma

Certifications: [AWS Solution Architect Associate Certified](#), Python, Data Structures, UI/UX Design

Databases: SQL, NoSQL, MongoDB, MySQL

Professional Experience

Test Automation Development Co-op, NOKIA – Fairfax, VA

Sep 2022 – May 2023

- Automated test suites with Python scripts, reducing manual testing time by 50%.
- Utilized Jenkins, GIT, and JIRA to identify, troubleshoot, and fix system flaws, thus enhancing software quality and speeding up delivery time and collaborated with developers and testers to integrate testing into Agile development.
- Resolved technical issues with cross-functional teams to deliver high-quality software on time while documenting the action taken.
- Demonstrated an understanding of business value and implications while collaborating with team members from different backgrounds.

Graduate Teaching Assistant, George Mason University – Fairfax, VA

Aug 2022 – Dec 2022

- Assisted with the course Ethics and Law for Computer Professionals (CS-306) as a teaching assistant. Responsibilities included creating lab assignments, grading assignments, and providing clarification to students.
- Monitored and analyzed cutting-edge industry trends, system analysis, and design developments, providing students with timely and relevant insights.
- Engaged with students to ensure understanding of course material and fundamental concepts.

Full-stack Developer, Let It Wag – Mumbai, India

Jun 2019 – May 2020

- Designed a real-time application which brings all stakeholders involved in animal welfare under one roof. "Let it Wag" has saved 4000+ animals and served 13K+ happy users. Ensured that software development was progressing on applications, applying agile methodology principles to keep projects on track.
- Engineered a mobile application utilizing advanced analysis and predictive algorithms to accurately diagnose disease based on user-input symptoms. [Mobile App: Download](#)
- Collaborated with team members for UI/UX design and API integration while managing and troubleshooting technical issues. Created and maintained repositories, including implementing, and enforcing Git workflow and branching strategies. Also, documented the development process for future reference.

Project Experience

Cloud Computing

May 2022 – Dec 2022

- **Amazon Web Services** | *Java, Spring Framework, AWS EC2, AWS S3, AWS RDS MySQL, Docker, Kubernetes, Angular, CSS3, Jenkins, Typescript, SoapUI*
- Programmed an application using Angular, RESTful Web Services, JPA/Hibernate, and Amazon Relational Database Service (Amazon RDS)/MySQL to persist and read data to/from a relational database.
- Containerized the application using Docker Technology and deployed it on Kubernetes, utilizing the Spring Framework and conducted data manipulation while collaborating with team members for API integration, environment setup, and production support.
- **Google Cloud Platform** | *ASP.NET Core MVC, Entity Framework, GitHub, Kubernetes, Jenkins, Rancher, GCP*
- Developed a containerized web application on GKE to enable scalability and resiliency.
- Created a CI/CD pipeline using Git as a source code repository on GitHub and Jenkins as the deployment tool for Kubernetes, while engaging with team members for troubleshooting and production support.

Telecom Churn Case Study | *Python, Data Mining, Machine Learning, Regression*

Feb 2022 – Apr 2022

- Developed a predictive model to forecast future telecom churn using existing churn data. Preprocessed and analyzed the data to reveal key insights, created new features, and used the Synthetic Minority Oversampling Technique to address the class imbalance.
- Implemented Decision Tree classifier and logistic regression, optimized their parameters to identify significant factors and achieved testing accuracies of 91.77% and 75.18%, respectively.
