SUMMARY

Actively looking for Summer 2022 Internship/Co-op opportunities in the field of computer science/software development to effectively utilize my knowledge and experiences gained. I'm known for dynamic personality, creative thinking, and analysis, who is comfortable to handle complex projects independently or working within teams.

EDUCATION

George Mason University, College of Engineering and Computing, United States Aug 2021 – May 2023

- Master of Science (MS) in Computer Science

University of Mumbai, Mumbai-India

Aug 2016 – Nov 2020

- Bachelor of Engineering - Computer Engineering | 3.2 GPA

SKILLS

Certification	AWS Cloud Practitioner (Trained); Python (Coursera); Data Science (Coursera); WordPress; C training; PHP; MySQL; Android App development; WEB-A-THON.
Languages	Python, SQL, JavaScript, HTML5, CSS, JAVA, C, C++, PHP
Technologies	AWS, Git, MySQL
Frameworks	React JS, Django, Angular, jQuery, Bootstrap, CodeIgniter
OS	Windows, Linux, Ubuntu
Behavioral	Excellent Written and oral communication, Team-worker, Problem-solving

ACADEMIC PROJECTS

Real Time Application: "Let It Wag" (Tool for an NGO)

- Designed a real-time application/platform which brings all stakeholders involved in animal welfare under one roof. This application acts as a free weapon which empowers the animal lovers to bring assistance to any animal, local volunteers, animal feeders, shelter homes, vets etc. by connecting them all on a single platform in REALTIME.
- This app is developed by extensive analysis and prediction techniques with the help of different algorithms to predict the diseases based on the symptoms shown by the user and provide a preliminary prognosis for the user for that instant, so that immediate necessary actions can be taken by the user before seeing the doctor.

Speech Synthesis (TTS) & Currency Converter

- Using HTML, CSS, and JavaScript, I built a Text-To-Speech system. Text-to-speech (TTS) is a type of assistive technology that has been increasingly popular in recent years. The JavaScript Speech Synthesis and Speech Synthesis Utterance objects offered by the Web Speech API can be used to transform text to speech.

Link: [Speech Synthesis \(TTS\)](#)

- Developed a Currency Converter using HTML, CSS, and JavaScript. You can enter your amount in this program and convert it to a foreign country's currency. **Link:** [Currency Converter](#)

Language Processing Voice-bot

- Developed a Natural Language Processing Multilingual voice Bot which can spread awareness and help an individual speak/interact in any language. It takes input from the user/individual and will respond back accordingly.

Cloud Computing: E-Commerce Website

- Designed the E-commerce Website using WordPress and hosted it using Google Cloud Platform
- Human Machine Interaction: E-Commerce Website

WORK EXPERIENCE

Volunteer - Shah & Anchor Kutchhi Engineering College

- Volunteered for "3D Modelling and Texturing for Game Development" organized by CSI (Computer Society of India) with Department of Computer Engineering.

Campus Ambassador – Internshala, Mumbai

- Promoted Internshala internships among peers and facilitated them to learn new skills via Internshala Trainings. Organized Training sessions for fellow Students to train on how to get an internship.

EXTRA-CURRICULAR

- Member of Computer Society of India: Involved in various volunteering activities and workshops.
- Few things about me: I'm a Fitness enthusiast, always try to learn new things and love helping.
