EDUCATION

George Mason University - Fairfax, Virginia

- Master of Science (MS) in Computer Science ~ (GPA: 3.5/4) **Aug 2021 - May 2023**
Courses: Software Engineering for Real-Time Embedded Systems, Component-Based Software Development, Software Engineering for World Wide Web, Theory/Application Data Mining, Analysis of Algorithms, Information Security Theory and Practice, Advance NLP.

University of Mumbai - Mumbai, India

- BE in Computer Engineering ~ (GPA: 3.2/4) **Aug 2016 – Nov 2020**
Courses: Data structures, Advanced Algorithm, Machine Learning, Natural Language Processing, Software Engineering, Web Design, Cloud Computing, Artificial Intelligence & Soft Computing, Operating System, and Advanced Operating System.

WORK EXPERIENCE

Test Automation Developer (Co-op) - NOKIA of America

Sep 2022 – Present

- Automated test suites with Python scripts, reducing manual testing time by 50%.
- Utilized Jenkins, GIT, and JIRA to identify, troubleshoot, and fix system flaws, thus enhancing software quality and speeding up delivery time. Employed Robot Framework to create and run automated test cases to ensure that software products meet quality standards and customer requirements.
- Collaborated with developers and testers to integrate testing into Agile development.
- Resolved technical issues with cross-functional teams to deliver high-quality software.

Graduate Teaching Assistant – George Mason University

Aug 2022 – Dec 2022

- Assisted with the course Ethics and Law for Computer Professionals (CS-306) as a teaching assistant. Responsibilities included creating lab assignments, grading assignments, and providing clarification to students.
- Monitored and analyzed cutting-edge industry trends, system analysis, and design developments, providing students with timely and relevant insights.

Full-stack Developer: “Let It Wag” (Tool for an NGO) - Mumbai, India

Jun 2019 - May 2020

- Designed a real-time application/platform which brings all stakeholders involved in animal welfare under one roof and connects them all on a single platform in REALTIME. “Let it Wag” has saved 4000+ animals with 13K+ happy users. Ensured that software development was progressing on applications, applying agile methodology principles to keep projects on track.
- In addition, developed a mobile application using extensive analysis and prediction techniques with the help of different algorithms to predict the diseases based on the symptoms shown by the user. **Website:** [Let It Wag](#) / **Mobile Application:** [Download the app](#)

SKILLS

Languages: Python, JavaScript, C, C++, Java, HTML5, CSS

Databases: SQL, NoSQL

Tools: Cloud Platforms (AWS, Google Cloud), Git, MySQL, Jenkins, Spring-Boot, Kubernetes, Docker, JIRA

Frameworks: React JS, Django, Angular, jQuery, Bootstrap, CodeIgniter, Ajax, Agile/Scrum

Certifications: AWS Solution Architect Associate Certified; Python; Data Science (Coursera); WordPress; Ajax and PHP; MySQL; Android App development; Accenture Virtual Experience Developer Program.

ACADEMIC/RESEARCH PROJECTS

Cloud Computing Projects:

May 2022 – Dec 2022

➤ Amazon Web Services

- Developed an application using Angular, RESTful Web Services, JPA/Hibernate, and Amazon Relational Database Service (Amazon RDS)/MySQL to persist and read data to/from a relational database.
- Containerized the application using Docker Technology and deployed it on the container orchestration platform Kubernetes.

➤ Google Cloud Platform

- Developed a containerized web application using the open-source container orchestration platform Kubernetes to enable scalability and resiliency. Created a Kubernetes cluster on Google's cloud platform with GKE.
- Created a CI/CD pipeline using Git as a source code repository on GitHub and Jenkins as the deployment tool for Kubernetes.

Research Paper

Sep 2022 – Dec 2022

- This paper addresses implementing blockchain technology to track cryptocurrency transactions on the Ethereum Client Hyperledger Besu platform.
- The Ethereum client allows nodes to communicate with one another and read blocks of the blockchain. **Link:** [Research Paper](#)

Telecom Churn Case Study

Feb 2022 – Apr 2022

- Developed a predictive model to forecast future telecom churn using existing churn data. Preprocessed and analyzed the data to reveal key insights, created new features, and used the Synthetic Minority Oversampling Technique to address the class imbalance.
- Implemented Decision Tree classifier and logistic regression, optimized their parameters to identify significant factors and achieved testing accuracies of 91.77% and 75.18%, respectively.
